

```

class Holiday
{
    String holidayname;
    int holiday;
    String holidaymonth;
public Holiday()
{
    holidayname="New year;
    holiday= 1;
    holidaymonth="january";
}

public Holiday(String name,int day,String month)
{
    holidayname=name;
    holiday= day;
    holidaymonth=month;
}
public static void main(String args[])
{
    Holiday Test= new Holiday("Ugadi",20,"March");
    System.out.println(Test.holidayname+" ");
    System.out.println(Test.holiday+" ");
    System.out.println(Test.holidaymonth+" ");
}
}

```

```

Output
C:\java\bin>java Holiday
Ugadi
20
March

```
